

Day 5: What do you remember?

Last Week...

What does half mean?

LO: To be able to half
numbers to 12

Can you whisper these words?

half

share

equal

Groups
of

same

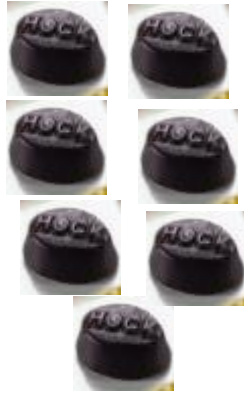

Chris has a packet of 14 sweets. He and Connor are trying to share it equally. Which picture shows them each having half?

5

9

7

7

8

6

Half of 14 is 7 so they would each need to have 7!

Chris has a packet of 16 biscuits. He and Connor are trying to share it equally. Which picture shows them each having half?

8

8

10

6

9

7

Chris and Connor are trying to share a pizza. It has 8 slices and they will both have the same. Chris thinks he should have 5 slices. Is this fair?

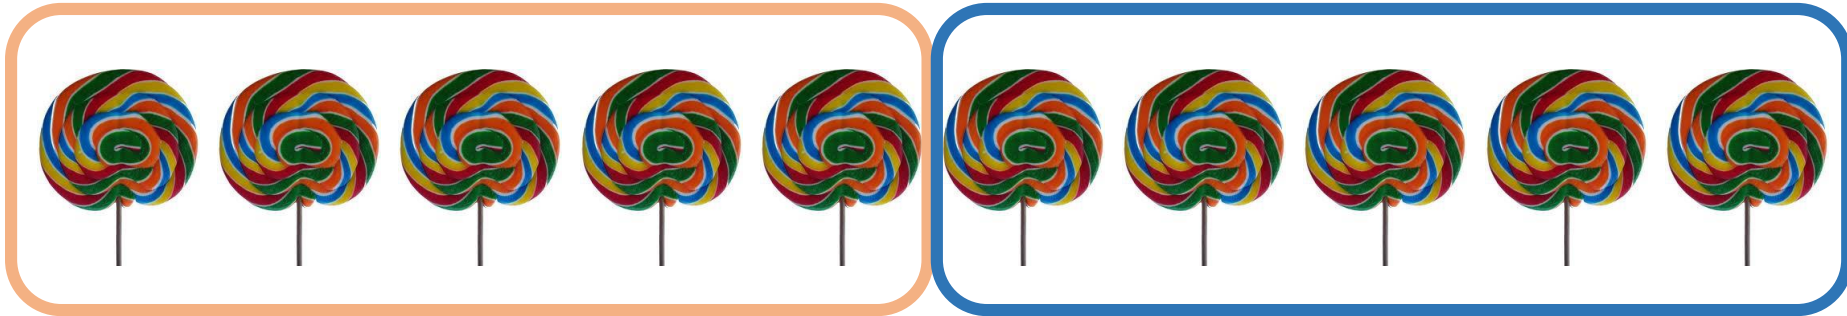

How many slices
will Connor get if
Chris has 5?

How many slices
should Connor
have if he has half?

What do you think is half of 10?

Hint- you can use your
fingers to help you!

5

What do you think is half of 12?

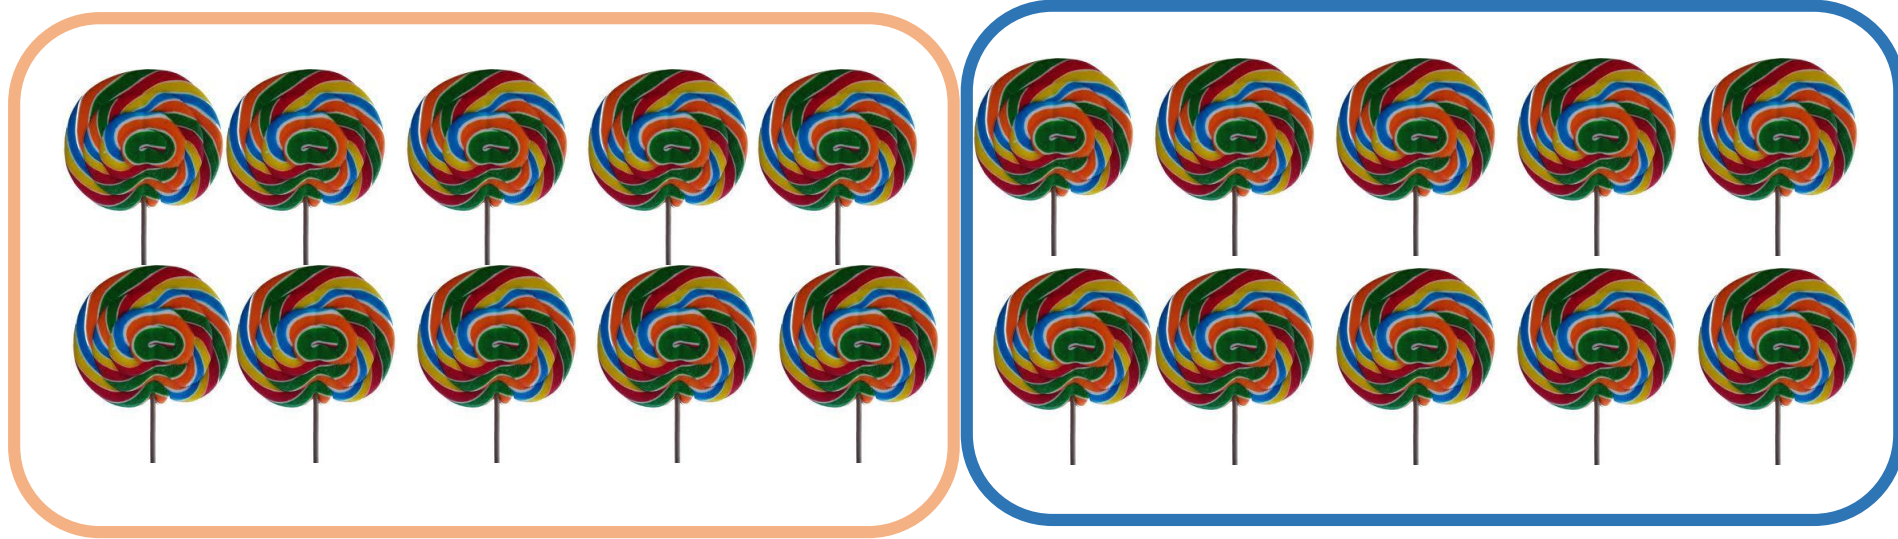

Remember- you need to
make sure both groups
have the same number!

6

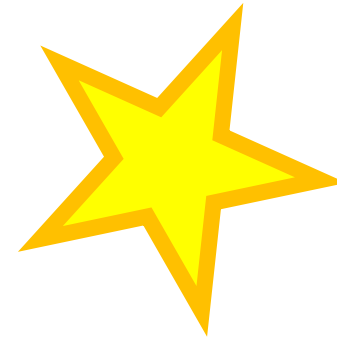

What do you think is
half of 20?

10

Challenge

What can you find around your house that you can share equally with someone at home? What happens if you try to share 9?
